

# Wireless Radiation

Yamar Ba

Survey data concerning health effects of wireless networks.

10 Multinomial variables with 1 binary variable.

125 respondents. 119 completed.

**Facts:**

- Wireless radiation from wireless networks are hazardous to one's health.
- There is a law that prevents the blocking or removal of cell towers or related equipment if the reason for doing so is related to health.
- 5G wireless networks require higher frequencies to work, which make them more harmful than 4G.

Can we predict who has heard of the negative health effects of wireless radiation?

Variables

Outcome: Q8 Predictors: Q2, Q3, Q4

Q3 5G will make my life better:

Q4 I think 5G is safer than 4G networks:

Q8 Have you ever heard of potential health risks involving wireless networks before

Q2 How would you rate your knowledge of 5G networks?

Given that you believe that you are very knowledgeable about wireless networks, the probability that you have not heard of the negative health effects of wireless networks is 87.6%

When you go from claiming to have knowledge of wireless networks to not having any knowledge the odds ratio that you have not heard of any negative health effects concerning wireless networks vs having knowledge is 8.74.

| Y.level | term          | estimate | std.error | statistic | p.value |
|---------|---------------|----------|-----------|-----------|---------|
| <chr>   | <chr>         | <dbl>    | <dbl>     | <dbl>     | <dbl>   |
| 1 no    | (Intercept    | 0.159    | 0.773     | -2.38     | 0.0174  |
| 2 no    | knowledgesome | 4.29     | 0.824     | 1.77      | 0.0770  |
| 3 no    | knowledgenone | 8.74     | 0.872     | 2.49      | 0.0130  |
| 4 no    | saferdisagree | 0.00004  | 64.7      | -0.158    | 0.875   |
| 5 no    | aferneutral   | 0.735    | 0.493     | -0.624    | 0.532   |

Can we predict who is more likely to be concerned about wireless radiation?

**Variables**

Outcome: Q10

Predictors: Q7,Q8,Q9

Q10 When you use your cellphone, tablet or laptop, you are not concerned about wireless radiation:

Q7 I prioritize my physical health:

Q9 How would you categorize your opinion of 5G?

Q8 Have you ever heard of potential health risks involving wireless networks before?

Given that you have a **positive opinion** about 5G the probability that you are not concerned about wireless radiation is 68.5%.

**Neutral opinion** -> 20.4 %

**Disagree** -> 11%.

When you go from having a positive opinion to a negative opinion the odds ratio that you are concerned about your wireless radiation vs not being concerned 9.25.

| y.level    | term            | estimate | std.error | statistic | p.value  |
|------------|-----------------|----------|-----------|-----------|----------|
| <chr>      | <chr>           | <dbl>    | <dbl>     | <dbl>     | <dbl>    |
| 1 neutral  | (Intercept)     | 0.297    | 0.343     | -3.53     | 0.000412 |
| 2 neutral  | opinionnegative | 5.05     | 0.975     | 1.66      | 0.0970   |
| 3 neutral  | opinionneutral  | 6.53     | 0.455     | 4.12      | 0.00004  |
| 4 disagree | (Intercept)     | 0.162    | 0.440     | -4.13     | 0.00004  |
| 5 disagree | opinionnegative | 9.25     | 1.01      | 2.20      | 0.0282   |
| 6 disagree | opinionneutral  | 2.18     | 0.647     | 1.20      | 0.230    |

Can we predict who is conscious of wireless radiation when in proximity to wireless tech?

Variables

Outcome: Q6 Predictors:Q1,Q2,Q9

Q6 There is no adverse health risk for using or being in proximity to wireless networks (i.e. wifi) or smart meters (smart meter: transmits usage data wirelessly):

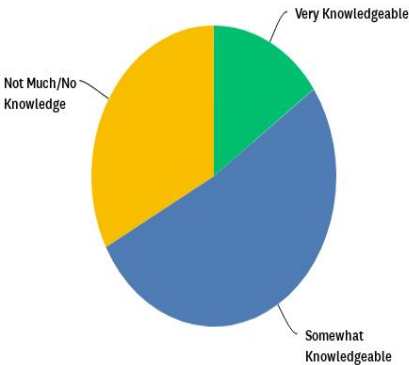

Q1 Education level reached:

Q9 How would you categorize your opinion of 5G?

Q2 How would you rate your knowledge of 5G networks?

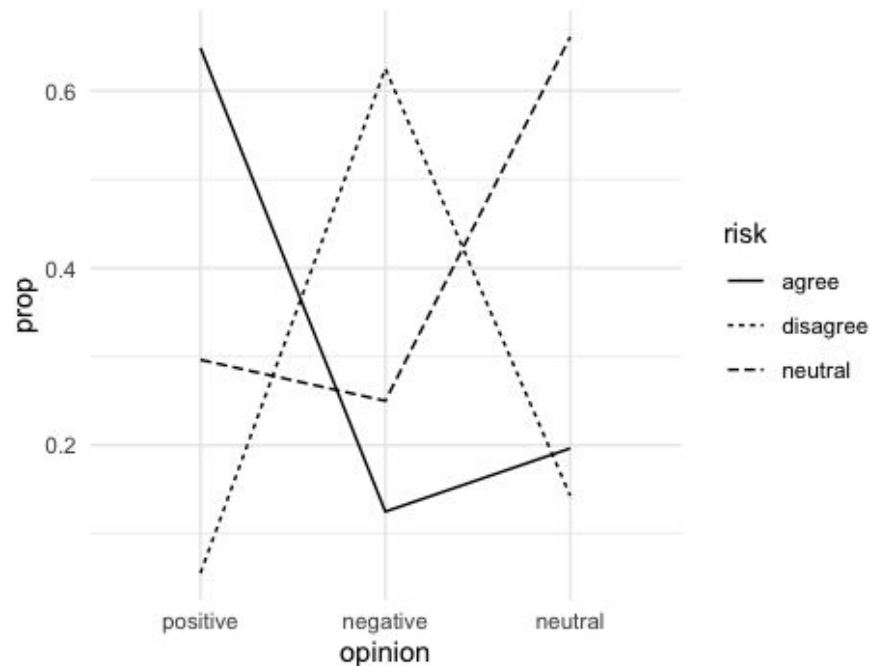

Given that they have a **positive opinion** about 5G networks the probability that they believe wireless networks pose no adverse health risk is 80%.

**Negative opinion** -> 9.7%

**Neutral opinion** -> 10.7%

When you go from having a positive opinion of wireless networks to a negative one, the odds ratio that you disagree with the statement, “wireless networks pose no adverse health risk” versus agreeing with the statement is 63.2

Can we predict who is more likely to believe that the government prioritizes their health?

Variables

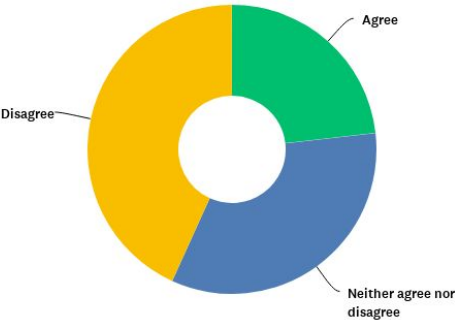

Outcome: Q11

Predictors: Q1, Q5, Q10

Q1 Education level reached:

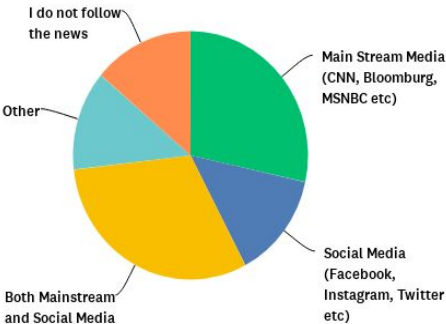

Q11 My health is a priority of my government:

Q10 When you use your cellphone, tablet or laptop, you are not concerned about wireless radiation:

Q5 I get most my news from:

Given that they get their news from the mainstream media the probability that they agree with statement, "the government prioritizes my health" is 35%.

Disagree with statement -> 29.4%

Neutral -> 35.4%

When you go from getting your news from mainstream media to social media, the odds ratio that you have a neutral opinion as to whether or not you think the government prioritize your health versus agreeing with the statement is 2.70.

| y.level | term                 | estimate | std.error | statistic | p.value |
